

Asset Management Report

Asset Management Division, Dam Safety and Infrastructure

Background

Since 2021, the Bureau of Reclamation (Reclamation) has provided Congress with a biennial report on Major Rehabilitation and Replacement (MR&R) long-term capital and repair needs, categorization of repair needs, and regular reporting of information related to Reclamation’s investments in infrastructure, pursuant to the [Reclamation Transparency Act \(Public Law No. 116-9\)](#). Reclamation has experienced increases in identified MR&R activities since the initial 2021 report. This increase is attributed to a concerted effort to have better resolution on all aging infrastructure needs, data collection in an enterprise-wide system, and transferred works activities. The addition of large-scale projects and inflation has contributed to the rise in expenses associated with MR&R activities. Over the last four years, Reclamation has invested \$3.5 billion to support MR&R activities. A detailed list of MR&R activities is attached in the Appendix.

Funding for Major Rehabilitation and Replacement Activities

The purpose of collecting MR&R on Reclamation’s infrastructure is to understand the extent of repair and replacement activities across Reclamation facilities and associated costs, regardless of the funding source. MR&R activities include all extraordinary maintenance (XM) activities, Safety of Dams program modifications, and deferred maintenance (DM) on a Reclamation facility that is intended to ensure the continued safe and reliable delivery of authorized Project benefits. Reclamation collects MR&R data at reserved works facilities (Reclamation operated and maintained) and transferred works facilities (non-Federal partner operated and maintained). These activities are reported and maintained at the field, regional, or program office level. In FY 2024, four identified activities have estimated costs at or above \$100 million: Folsom Dam (\$250 million), Coleman National Fish Hatchery (\$240 million), Shasta Power Facility (\$145 million), and Owyhee Irrigation District Canals (\$100 million). Reclamation has over 2,400 activities with total anticipated costs over \$24.7 billion for the next 30 fiscal years (FY) (2025 to 2054).

Funding MR&R activities relies on a mix of appropriated and non-appropriated sources. Figure 1 identifies anticipated funding categories for MR&R activities through the next five years (2025 to 2029), with anticipated costs at \$11.9 billion. Of the five-year MR&R estimate, approximately \$4.7 billion is planned to

be funded by Reclamation appropriations.

Other Federal accounts for the largest percentage (31%) of appropriated funding over the next five years and largely represents transportation needs identified in Reclamation’s Long Range Transportation Plan (LRTP). Specifically, Pit River Bridge over Shasta Reservoir in California, which is the nation’s only federally-owned Interstate bridge, contributes to the large increase. The aging structure is in need of rehabilitation, with the preliminary estimated cost to fully replace the bridge at \$6.7 billion. Additionally, the LRTP indicates a transportation funding gap of \$430 million over the next 10 years.

MR&R Needs by Funding Category

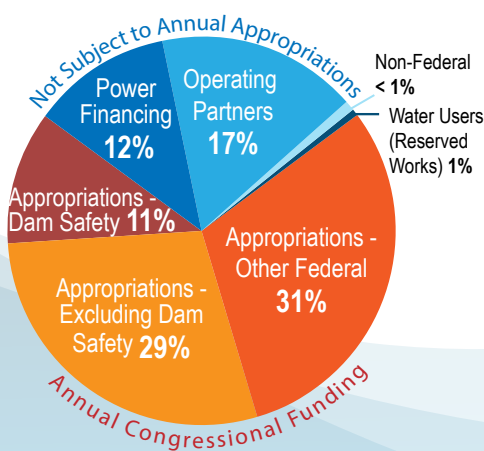

Figure 1. \$11.9 B in MR&R activities anticipated to be funded in FY 2025-2029 by Funding Category.

Major Rehabilitation and Replacement Activities

FY 2023-2024 Accomplishments

- 400 total MR&R activities addressed
- \$733 M in estimated MR&R costs addressed

Next 30 Years

\$11.9 B	\$15.6 B	\$24.7 B
5 Year	10 Year	30 Year

- Over 2,400 MR&R activities planned over the next 30 years
- Approximately 84 percent of activities have been identified at a preliminary cost estimate
- Transferred Works accounts for 53 percent of the MR&R activities planned for the next 30 years

Aging Infrastructure Account

- 4 of 5 application cycles have been completed with over 380 applications
- Allocations have supported over 200 projects since FY 2022
- \$2.2 billion has been allocated to support XM projects
- 41% of projects are anticipated to be completed within the next three years
- Fund type, procurement, and multiple other factors may affect project completion

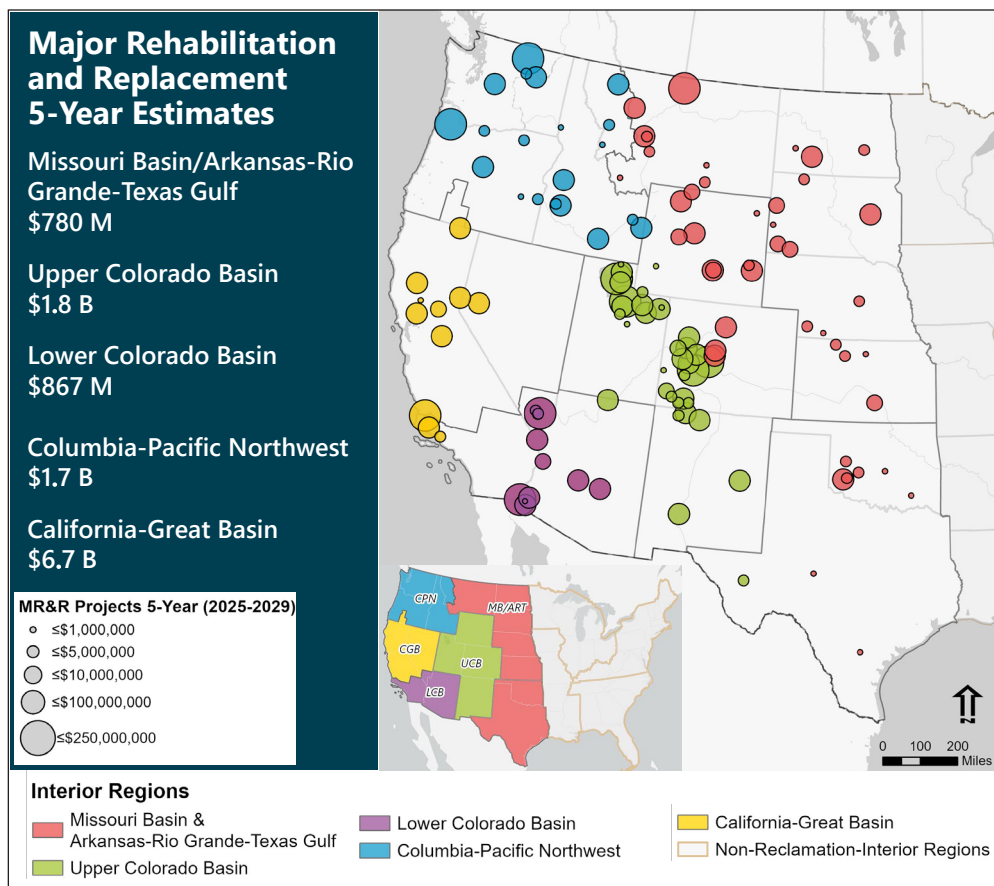

Figure 2. Map of MR&R activities funded in FY 2025-2029 by Department of the Interior regions.

Categorization of Activities

The Reclamation Transparency Act requires Reclamation to identify a system for categorizing MR&R activities based on a comparison of the benefit of the activity, the risk of not conducting the activity, and costs associated with the activity. Reclamation uses a weighted Categorization Rating methodology and requires each MR&R activity to have a rating. Ratings range from A for activities that present a higher risk of negative consequences if they are not completed and are thus of the greatest relative importance, to E for activities with a relatively low risk of negative consequences if they are not completed.

MR&R Risk and Benefit Categorization

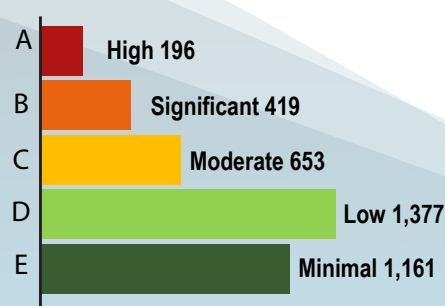

Figure 3. MR&R Activities identified for funding in the FY 2025-2054 period, organized by MR&R Risk and Benefit Categorization.

Figure 3 shows the MR&R activities identified in the FY 2025 to 2054 timeframe by category. Since the 2023 report, all Categorization Ratings have seen an increase. Category E saw the largest increase with 361 activities identified. This is expected due to the nature of MR&R activities planned out over a 30-year horizon.

Data Reporting Process

Reclamation's biennial reports to Congress describe the agency's effort to standardize and streamline data reporting processes across its regions. Reclamation continues to implement its strategy to improve the quality of MR&R data at reserved works facilities, DM reporting, and outreach to Reclamation transferred works operators. Reclamation also continues to utilize and enhance the centralized database to streamline the data reporting process for collection and analysis of MR&R data. In FY 2024, Reclamation began developing a preliminary cost estimating tool to help support planned MR&R activities. In addition to various tools to assist with data quality assurance, Reclamation released a new Reclamation Manual Directives and Standards [CMP 08-01, Capital Investment and Repair Needs](#),

to document various requirements for consistency across the bureau.

Infrastructure Investment and Jobs Act

In November 2021, Pub. L. 117-58, also known as the Infrastructure Investment and Jobs Act (IIJA), authorized \$3.2 billion over five years for Reclamation's XM needs. Pub. L. 116-260, Title XI, Sec. 1101 (the Act) amended Reclamation's existing XM authority by creating the Aging Infrastructure Account (Account). The Act requires Reclamation to establish an annual application period for eligible contractors to apply for funds from the Account. The first application period for funding from the Account was established in FY 2022.

The IIJA investment in the Account has significantly increased Reclamation's efforts to support our partners, stakeholders, Tribal nations, and communities in the 17 Western States. The Account has allocated \$2.2 billion to support over 200 projects to date, including the Delta-Mendota Canal Subsidence Correction Project in the California-Great Basin Region, the Leadville Treatment Plant in the Missouri Basin and Arkansas-Rio Grande-Texas Gulf Regions, the Roza Fish Screen Modifications in the Columbia-Pacific Northwest Region, the Glen Canyon Outlet Works project in the Upper Colorado Basin Region, and several All-American Canal System lateral replacement projects in the Lower Colorado Basin Region.

Future Actions and Challenges

Reclamation continues to face challenges associated with aging infrastructure. Many Reclamation facilities (e.g., dams, canals, bridges, buildings) are approaching or are over 100 years old and need upgrades or replacement. The cost of maintaining, repairing, or replacing these facilities is a significant challenge as additional demands placed on our aging infrastructure combine with longstanding drought. The challenges we face today are notable – but collaborating with all our partners is imperative to ensure reliable and efficient delivery of Project benefits to the American public.

RECLAMATION

Public Report

Asset Management Report

Appendix 1A- List of Major Rehabilitation and Replacement Activities FY 2025-2054

The activities and associated cost estimates identified in this report are projected needs, may not reflect currently funded priorities, and initiation of construction may not be underway at time of publication. The (*) denotes cost estimates listed in the funding categories are preliminary level cost estimates and should not be used for budgeting purposes as they do not meet the requirements for a feasibility level cost estimate and are subject to revision. Additionally, ongoing discussions on cost share for certain transferred works, which involve water users and State and local governments, may affect the ultimate Federal cost share. The "AIA" column denotes "Y" if the MR&R activity was allocated funding from the Infrastructure Investment and Jobs Act, Aging Infrastructure Account.

Controlled Unclassified Information (CUI) has been redacted from the public release of this report.

Washington	5	Okanogan Project	Shellrock Pumping Plant Fish Screen	Transferred	Shellrock Pumping Plant Pump and Motor Replacement	D	Not Applicable per P.L. 116-9										*		
Washington	5	Columbia Basin Project	Laterals Block 2	Transferred	Burbank Pumping 1 Lateral Reconstruction	E	Not Applicable per P.L. 116-9										*		
Washington	5	Okanogan Project	Shellrock Pumping Plant Fish Screen	Transferred	Shellrock Pumping Plant Filtration System	E	Not Applicable per P.L. 116-9										*		
Washington	8	Columbia Basin Project	Winthrop Circular Tanks	Reserved	Winthrop Circular Tanks and Backbone Water System	B	\$ 29,171,771	\$ 27,838,771	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 27,838,771	*			
Washington	8	Columbia Basin Project	Leavenworth Fish Hatchery	Other	Leavenworth Fish Hatchery: Surface Water Intake Rehabilitation	C	CUI											Y	
Washington	8	Columbia Basin Project	Leavenworth Fish Complex	Other	Leavenworth Fisheries Complex: Automation of Snow and Nada Dams	E	\$ 700,000	\$ 700,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 700,000	*			
Wyoming	0	Pick-Sloan Missouri Basin Project, Riverton Unit	Bull Lake Dam (Bull Lake Creek)	Transferred	Bull Lake Dam SOD Modifications	A	Not Applicable per P.L. 116-9												

								Funding Categories												
State	Congressional District	Authorized Project	Asset Name	Transferred/ Reserved Works	Brief Description of Future Work Activities	MR&R Categorization Rating	Estimated Total Costs	Appropriated			Non-Appropriated					MR&R Planned (2025-2054)		AIA		
								Reclamation Excluding Dam Safety	Reclamation Dam Safety	Other Federal	Non-Federal	Power Financing	Reserved Works Water Users	Transferred Works						
Wyoming	0	Minidoka Project	Jackson Lake Dam And Reservoir	Reserved	Jackson Lake Dam: Service Gate Control Box Replacement	B	\$ 100,000	\$ 9,000	\$ -	\$ -	\$ -	\$ -	\$ 16,000	\$ -	\$ 25,000	*				
Wyoming	0	Minidoka Project	Jackson Lake Dam And Reservoir	Reserved	Jackson Lake Dam: Spillway Concrete Repairs	B	\$ 1,100,000	\$ 411,000	\$ -	\$ -	\$ -	\$ -	\$ 689,000	\$ -	\$ 1,100,000	*				
Wyoming	0	North Platte Project	Fort Laramie Canal	Transferred	Goshen Irrigation District: Fort Laramie Canal Tunnel No. 2 Replacement	B	Not Applicable per P.L. 116-9									*	Y			
Wyoming	0	Minidoka Project	Jackson Lake Dam And Reservoir	Reserved	Jackson Lake Dam: Repair or Replace Outlet Works Gate No. 7	C	\$ 320,000	\$ 48,000	\$ -	\$ -	\$ -	\$ -	\$ 82,000	\$ -	\$ 130,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Kortes Unit	Kortes Dam, Reservoir (North Platte River)	Reserved	Left Abutment Rock Removal and Repair/Replace Broken Rock Arrester	C	\$ 5,400,000	\$ -	\$ -	\$ -	\$ -	\$ 5,400,000	\$ -	\$ -	\$ 5,400,000					
Wyoming	0	Pick-Sloan Missouri Basin Project, Kortes Unit	Kortes Power Facility (3 Units)	Reserved	Penstock Intake Concrete Repair	C	\$ 2,320,000	\$ -	\$ -	\$ -	\$ -	\$ 2,320,000	\$ -	\$ -	\$ 2,320,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, O&M-North Platte Area	Casper Control Center	Reserved	HVAC Replacement	C	\$ 2,500,000	\$ 2,445,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 2,445,000					
Wyoming	0	Shoshone Project	Frannie Division Drains (Deaver Irrigation District)	Transferred	Deaver Canal Drop Structure and Chute No. 1 Replacement	C	Not Applicable per P.L. 116-9									*				
Wyoming	0	Kendrick Project	Alcova Powerplant	Reserved	Alcova Station Service Replacement		CUI									*				
Wyoming	0	Kendrick Project	Seminole Powerplant (3 Units, 51.75)	Reserved	Mechanical/Electrical Overhaul	D	\$ 1,800,000	\$ -	\$ -	\$ -	\$ -	\$ 58,201,000	\$ -	\$ -	\$ 58,201,000					
Wyoming	0	Lyman Project	Meeks Cabin Dam	Transferred	Repair Damaged Concrete in the Outlet Works Stilling Basin	D	Not Applicable per P.L. 116-9									*				
Wyoming	0	Lyman Project	Stateline Dam (East Fork Of Smiths Fork)	Transferred	Repair Damaged Concrete in the Outlet Works Stilling Basin Floor	D	Not Applicable per P.L. 116-9									*				
Wyoming	0	Minidoka Project	Jackson Lake Dam And Reservoir	Reserved	Jackson Lake Dam: Crew House/Dam Tender House Roof Replacement	D	\$ 160,000	\$ 60,000	\$ -	\$ -	\$ -	\$ -	\$ 100,000	\$ -	\$ 160,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Boysen Unit	Boysen Dam, Reservoir (Wind River)	Reserved	Radial Gate Painting Repair, Outlet Works Piping Repair and Coating, Dam Spillway and Concrete Repair	D	\$ 7,050,000	\$ 7,050,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 7,050,000					
Wyoming	0	Pick-Sloan Missouri Basin Project, Boysen Unit	Boysen Power Facility (2 Units)	Reserved	Mechanical/Electrical Overhaul	D	\$ 77,600,000	\$ -	\$ -	\$ -	\$ -	\$ 60,690,000	\$ -	\$ -	\$ 60,690,000					
Wyoming	0	Pick-Sloan Missouri Basin Project, Buffalo Bill Dam Modification	Buffalo Bill Visitor Center	Reserved	Buffalo Bill Visitor's Center Parking Lot Design and Construction	D	\$ 25,000,000	\$ -	\$ -	\$ 25,000,000	\$ -	\$ -	\$ -	\$ -	\$ 25,000,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Buffalo Bill Dam Modification	Shoshone Powerplant (1 Unit)	Reserved	Replace Excitation System	D	\$ 500,000	\$ -	\$ -	\$ -	\$ -	\$ 500,000	\$ -	\$ -	\$ 500,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Buffalo Bill Dam Modification	Shoshone Powerplant (1 Unit)	Reserved	Turbine, Stator, and Rotor Refurbishment or Replacement	D	\$ 15,000,000	\$ -	\$ -	\$ -	\$ -	\$ 15,000,000	\$ -	\$ -	\$ 15,000,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Glendo Unit	Glendo Dam, Dikes, Reservoir (North Platte River)	Reserved	Steel Outlet Works Pipe Painting	D	\$ 75,000	\$ 75,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 75,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Glendo Unit	Glendo Power Facility (2 Units)	Reserved	Replace or Upgrade Station Service	D	\$ 2,500,000	\$ -	\$ -	\$ -	\$ -	\$ 2,500,000	\$ -	\$ -	\$ 2,500,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Glendo Unit	Gray Reef Dam, Reservoir (North Platte River)	Reserved	Recoat Upstream and Downstream Faces and Interiors of Radial Gates	D	\$ 1,000,000	\$ 1,000,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 1,000,000	*				
Wyoming	0	Pick-Sloan Missouri Basin Project, Keyhole Unit	Keyhole Dam Road	Transferred	Keyhole Spillway Embankment, Roads, Crossing and Rip Rap Repair	D	Not Applicable per P.L. 116-9									*				
Wyoming	0	Seedskadee Project	Fontenelle Dam And Reservoir	Reserved	Refurbish Fixed Wheel Gate Hydraulic System	D	\$ 365,363	\$ -	\$ -	\$ -	\$ -	\$ 365,363	\$ -	\$ -	\$ 365,363	*				
Wyoming	0	Seedskadee Project	Fontenelle Power Plant	Reserved	Replacement of Station Service Switchgear	D	CUI													
Wyoming	0	Shoshone Project	Buffalo Bill Dam, Reservoir (Shoshone River)	Reserved	Dam Intake Sediment Removal	D	\$ 5,000,000	\$ 5,000,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 5,000,000	*				
Wyoming	0	Shoshone Project	Willwood Diversion Dam	Transferred	Sluice Gate Repair and Gate Replacement	D	Not Applicable per P.L. 116-9									*				
Wyoming	0	Lyman Project	Stateline Dam (East Fork Of Smiths Fork)	Transferred	Hillside Stabilization Above Spillway Stilling Basin	E	Not Applicable per P.L. 116-9									*				
Wyoming	0	Minidoka Project	Grassy Lake Dam And Reservoir	Transferred	Grassy Lake Dam Spillway Outlet: Repair Wingwall Spalling and Erosion Damage	E	Not Applicable per P.L. 116-9									*				
Wyoming	0	North Platte Project	Guernsey Dam, Reservoir	Reserved	Tailrace Concrete Repair	E	\$ 2,300,000	\$ -	\$ -	\$ -	\$ -	\$ 2,300,000	\$ -	\$ -	\$ 2,300,000
