WaterSMART Grants

# **Regional Landscape Water Use Efficiency Project Southwest Los Angeles County Area**

# **Final Project Report**

Agreement # R15AP00133 West Basin Municipal Water District 17140 S. Avalon Blvd. August 26, 2020

West Basin Municipal Water District
Gus Meza, Sr. Water Policy & Resources Analyst
17140 S. Avalon, Carson CA 90746
(P) <b>310-660-6209</b> / (C) <b>213-500-6658</b>
Regional Landscape Water Use Efficiency Project
R15AP00133
August 12, 2015
September 30, 2017
March 31, 2020

Original Funding Information	Funding Amount
Non-Federal Entities	
1. West Basin Municipal Water District	\$50,000 (cash)
2. West Basin	\$50,000 (in-kind)
3. Metropolitan Water Company	\$631,560 (cash)
Non-Federal Subtotal:	\$731,560
Other Federal Entities	
1. None	
Other Federal Subtotal:	
Requested Reclamation Funding:	\$299,000
Total Project Funding:	\$1,030,560

<b><u>Final</u></b> Funding Information	Funding Amount
Non-Federal Entities	
1. West Basin	\$39,028.01 (in-kind)
2. Metropolitan Water Company	\$1,614,971 (cash)
Non-Federal Subtotal:	\$1,653,999.01
Other Federal Entities	
2. None	
Other Federal Subtotal:	
Requested Reclamation Funding:	\$299,000
Total Project Funding:	\$1,952,999.01

### 3. One Paragraph Project Summary:

The goal of this project was to target the removal of 450,000 square feet (sf2) of high water and energy consumption lawns in West Basin's service area. West Basin leveraged its partnership with the Metropolitan Water District (MWD) to provide increased turf removal rebates that motivated the public to make changes to their landscapes. MWD provided \$2 per square foot (sf2) through its regional rebate program. West Basin leveraged MWD's program to add the grant's additional \$1 / sf2 rebate, for a total maximum of \$3 / sf2. In addition to the increased grass replacement rebate, this program was to provide between 100 – 270 pre and post turf removal site visits and 450 rain barrels.

**4. Final Project Description:** Briefly describe components of the project and the work completed, including each element of the scope of work and the work completed at each stage of the project. Please include maps, sketches, and/or drawing of the features of the completed project, as appropriate. In addition, please describe any changes in the project scope.

This program contained several components that were successfully implemented by various partnerships and resources and with support from the United States Bureau of Reclamation (Reclamation). As part of this grant program, West Basin partnered with Reclamation to provide an additional \$1 per square foot (\$299,000 grant) to add to MWD's \$2 per square foot, for a total of \$3 per square foot. (\$2 MWD and \$1 USBR). West Basin and its partners promoted the increased rebates and surpassed the goal of removing 450,000 square feet, <u>by actually removing almost double that amount of 854,648 square feet</u>.

The next program goal was to conduct 100 - 270 pre and post residential surveys. West Basin utilized its vendor to conduct 150 surveys and to install 2,414 high-efficiency sprinkler nozzles. The vendor also promoted the \$3 per square foot rebate which helped to exceed the turf removal goal.

The program also provided 450 rain barrels to residents. West Basin leveraged its rain barrel program to meet this component goal.

West Basin utilized its partnerships with Reclamation, MWD and its vendors to successfully implement the various components of this program.

**5. Accomplishment of Project Goals:** Describe the goals and objectives of the project and whether each of these was met. Where appropriate, state the reasons why goals and objectives were not met, and describe any problems or delays encountered in completing the project. Please include whether or not the project was completed within cost.

West Basin has met all the goals of the program. West Basin utilized the \$299,000 grant to provide an additional \$1 per ft2 to remove a minimum of 450,000 sf2. West Basin and its partners promoted the increased rebates and surpassed the goal by removing 854,648 square feet.

West Basin met the goal of conducting 100 - 270 pre and post residential surveys. West Basin utilized its vendor to conduct 150 surveys and install 2,414 high-efficiency sprinkler nozzles.

The program also provided over 450 rain barrels to residents. West Basin leveraged its rain barrel program to meet this component goal.

The project was completed within the cost of the grant program, however, in the end, West Basin and MWD did provide a greater amount for the turf replacement rebates, which contributed to a larger amount of grass being removed and larger water savings.

**6.** Discussion of Amount of Water Conserved, Marketed or Better Managed: In responding to the questions set forth below, Recipients should rely on the best data or information available. Actual field measurements should be used whenever possible (e.g., baseline data or post-project data derived from measuring devices, diversion records, seepage tests, etc.) Where actual field measurements are not available, water savings (or amounts marketed or better managed) may be estimated based on studies, other similar improvement projects, or anecdotal evidence.

A. Recipient's total water supply (average, annual, available water supply in acre-feet per year):

From 2009 to 2019, West Basin's 10-year average of annual potable water sales was 106,394 AF per year.

**B.** Amount of water conserved, marketed or better managed as a result of the project (in acre-feet per year):

The goal for this project was to conserve a total of 60 AF of imported water per year, assuming that 450,000 or over 600 AF in a 10-year period. Since the data shows that 854,648 sf was actually removed, a total of 37,600,000 gallons were conserved per year, or 111 AF per year, or 1,110AF conserved over 10 years, well exceeding the program goal.

**C.** Describe how the amounts stated in response to 6.B were calculated or estimated: *In responding to this question, please address* (1) - (3) *below.* 

### (1) Describe the information/data being relied on to calculate/estimate the project benefits. State how that data/information was obtained, if appropriate. Provide any other information necessary to explain how the final calculation/estimate of project benefits was made.

The information used to calculate the water savings came from the Metropolitan Water District of Southern California. For the turf removal savings, they currently use a factor of 44 gallons saved per square foot per year (industry standard). This amount was multiplied by 450,000 square feet of turf removed to derive at a total amount of 19,800,000 gallons saved per year. The same per square foot factor was used to calculate the actual square foot removed to generate the 37,600,000 gallons of savings, utilizing the actual sf2 savings of 854,648 sf2.

# (2) As appropriate, please include an explanation of any concerns or factors affecting the reliability of the data/information relied on.

There are no concerns or factors affecting the reliability of the data or information relied on.

(3) Attach any relevant data, reports or other support relied on in the calculation/estimate of project benefits, if available. Please briefly describe the data/information attached, if any.

No additional information.

**D. Use of Conserved Water:** *Please explain where the water saved, marketed, or better managed, as a result of the project is going (e.g. used by the recipient, in stream flows, available to junior water users, etc.)* 

The conserved water from this project will remain at the two main sources of imported water; the Colorado River and the Sacramento Bay-Delta system.

**E.** Future tracking of project benefits: Please state whether and how the recipient plans to track the benefits of the project (water saved, marketed or better managed) in the future. If no actual field measurements are currently available to support the estimate of project benefits in 6.B., please state whether actual field measurements will become available in the future. If so, please state whether the Recipient is willing to provide such data to Reclamation on a voluntary basis once it is available.

West Basin is willing to work with its water retailers to conduct a comparison of pre and post water usage to analyze the water use.

**7. Discussion of Amount of Renewable Energy Added:** *If your project included the installation of a renewable energy component, please describe the amount of energy the system is generating annually. Please provide any data/reports in support of this calculation.* 

West Basin's Program focused mainly on water conservation efforts, but studies have shown that conserving water can also help reduce pumping needs to transport water, also known as embedded energy savings from water conservation. This project is helping with the efficacy of water and energy management by helping to reduce the use of imported water supplies, thereby reducing energy demands associated with importing water from the California State Water Supply and Colorado River.

- a) Of total current supplies for the West Basin Region, 62% is imported water, 18% is groundwater, 19% is recycled water, and less than 1% of the water can be classified as other, which includes sources such as desalted groundwater.
- b) In addition to the water-energy nexus achieved through reduced importation, groundwater pumping can also be curtailed if water usage is optimized. This can result in further energy savings through reduced pumping.
- c) Water-Energy savings are also obtained through the reduced use of fossil fuels needed for maintenance of turf. California Friendly gardens require a different type of maintenance, such as trimming and providing, eliminating the need of polluting lawn mowers.

The State of California is currently working diligently to encourage cities to use local water resources rather than relying on imported water sources. This is because it is estimated to take an average 2,544 kWh of energy to pump just one-acre foot of water over the mountain ranges from the California Bay-Delta and the Colorado River via the Aqueduct into southern California. West Basin's Project will help reduce the Region's cumulative burden on the State-wide energy demands.

8. Describe how the project demonstrates collaboration, stakeholder involvement or the formation of partnerships, if applicable: *Please describe the collaboration involved in the project, and the role of any cost-share or other types of partners. If there were any additional entities that provided support (financial or otherwise), please list them.* 

West Basin would like to thank the partnership with Reclamation, who helped to make this this project possible with their \$299,000 grant award. For this project, West Basin partnered with the Metropolitan Water District of Southern California (MWD) who provided a cost-share of \$2 per square foot. West Basin also provided several in-kind resources. West Basin utilized its contract with WaterWise Consulting to provide the landscape surveys. West Basin also utilized its rain barrel program to provide participants and residents with 450 rain barrels. West Basin collaborated with its local water retailers and cities to promote the "Turf's-up' Program. West Basin also used its partnership with the South Bay Environmental Services Center (www.SBESC.com) to promote the program.

### 9. Describe any other pertinent issues regarding the project:

The Colorado River Watershed is a symbol of the West and sustains life in the dry states through which it passes. The vitality of the Colorado River depends on healthy water flows. These flows are being compromised by current water management practices (i.e. growing demands) and policies, as well as by a warming climate. This Project will help reduce the amount of imported water transported from the Bay-Delta and the Colorado River in an amount of 1,100 AF. Approximately 62% of the imported water that is delivered to the West Basin service area is both from the Bay-Delta and the Colorado River.

Figure 5-1 below illustrates the location of West Basin MWD in relation to the Basin States that receive Colorado River water. As illustrated, West Basin is located within one of those areas.

The challenges and complexities of ensuring a sustainable water supply and meeting future demand in an over-allocated and highly variable system such as the Colorado River have been recognized and documented in a recent *Colorado River Basin Water Supply and Demand Study (2012)*.

Figure 5-1. The hydrologic boundaries of the Basin within the United States, plus the adjacent areas of the Basin States that receive Colorado River water.

The West Basin Program will contribute towards better management and sustainability of the Colorado River water supplies. The Project implemented adaptive water sustainability practices, as identified within the Colorado River Basin Plan, by preserving water, through conservation, within the Colorado River Watershed. The additional water conserved through implementation of this project will facilitate Reclamation activities such as flooding and scouring of the Colorado River that helps to build and maintain habitat for sensitive and endangered species.

**10. Feedback to Reclamation regarding the WaterSMART Program:** *Please let us know if there is anything we can do to improve the WaterSMART program in general, including the process for applying for or completing a WaterSMART project. Your feedback is important to us.* 

West Basin would like to thank Reclamation staff for the contract extensions that allowed West Basin to complete this project. The WaterSMART Program provides great assistance to water agencies in order to implement the various projects that conserve water, energy and increase the areas local water supply reliability, reducing the need for imported water.

NOTE: This Final Report Format is a suggested format only; the recipient may use its own form or format. A report in this form will satisfy the requirements of 43 CFR 12.80 or 12.951, as applicable. Failure to submit timely and acceptable progress reports places a recipient in noncompliance with the terms and conditions of the assistance agreement. Noncompliance can result in the withholding of assistance payments, suspension or termination of the assistance award and may delay further awards.

# **SAMPLE FINAL PROJECT COSTS TABLE.** *Please provide a breakdown of the*

*final costs of your project*. The following table is provided as an example and may be modified as needed.

## Exhibit 8 – Marketing Flyer – Turf's Up

Together we can save more.

### **3 Steps to Qualify:**

#### STEP 1

Call WaterWise Consulting at 888-987-9473 for a free landscape evaluation. Evaluation includes turf measurements, drought-tolerant garden information, up to two free rain barrels, and details on how to apply for the turf removal rebate.

#### STEP 2

Register for the turf rebate at www.socalwatersmart.com or by calling 888-376-3314. \$3 paid up to 3,000 square foot maximum. Project must be completed within 120 days after receiving approval confirmation.

#### STEP 3

Contact WaterWise Consulting to schedule verification of the completed garden project and rain barrel installation (if applicable).

Applications received prior to June 29, 2015 do not qualify. Funding is limited and is first-come, first-served. Funding can end at any time and is not guaranteed. Rebate is paid after installation is complete.

www.westbasin.org © 2015 West Basin Municipal Water District | 06262015

#### Participating retail agencies:

City of El Segundo, City of Inglewood, City of Lomita, City of Manhattan Beach, California American Water, California Water Service Co., Golden State Water Co., and Los Angeles County Waterworks District #29

Sponsored, in part, by:

## **Exhibit 8 – Marketing Flyer – Rain Barrel Events**

# West Basin Municipal Water District **Rain Barrel Program**

# Help Conserve Water with a **FREE Rain Barrel**

Register today to receive your FREE rain barrel from West Basin at one of five distribution events for District residents.

By using rainwater in your garden, you can be water efficient and help reduce the amount of water that flows into storm drains.

#### Register

www.westbasin.org/rainbarrels 🖀 (310) 371-4633

Advance registration is required. Quantities are limited and available on a first come, first served basis. Rules and restrictions apply.

- Must install rain barrels within 30 days
- Must allow for rain barrel installation inspection or you may be charged for the cost of the rain barrel
- West Basin residents are eligible to attend any event

### **Distribution Events**

#### Division I

Saturday, November 17, 2018 8am **-** 11am

Palos Verdes Peninsula High School 27118 Silver Spur Rd. Rolling Hills Estates, CA 90274

**Division IV** Saturday, January 12, 2019 8am **-** 11am
