Discussion Items

- Green Sturgeon Real Time Operations

- Reclamation released a Green Sturgeon Assessment to look at the recent increase of green sturgeon salvage and incidental take limit exceedance. The assessment considers an increase in green sturgeon populations and detections from the relatively wet springs in recent years or hydrodynamic conditions associated with low inflow on the Sacramento and San Joaquin and high levels of pumping in September.
 - The SWRCB asked if Reclamation had any changes that may be implemented.
 - Reclamation indicated that there are not currently any plans.
 - Further discussion needed with NMFS representative when available.

Action Items

- No Action Items.

Elevation Items

- No elevation items.
