Announcements

- Kearns & West will be transitioning their facilitation from Weekly DMW to the newly established Delta Action Team as part of Reclamation's Action 5 operations plan.
- The Delta Action Team meeting will be held every Tuesday from 10 a.m. to 11 a.m. PT.
- Calendar invites have been sent. If DMW attendees did not receive an invite, please contact the Kearns & West team.

Review Operations Outlook

- The Central Valley is experiencing persistent fog and unseasonably cool temperatures, partly due to a build up of pressure in the Pacific Northwest region.
- Combined water project exports have been reduced over the last week in response to degrading west Delta water quality. Over the last several days, the situation appears to have stabilized.

- Sacramento River releases at Keswick Dam are currently at 4,000 cfs.
- Feather River releases are currently at 1,950 cfs and are expected to be maintained at this level for the week.
- American River releases at Nimbus Dam are 1,000 cfs.
- Stanislaus River releases at Goodwin Dam are currently at 400 cfs and will be reduced to 200 cfs on December 10.
- Clifton Court exports are at 2,000 cfs
- JPP exports are at 900 cfs.

Additional Questions or Comments

- No questions asked.

Review PA Assessment (Reclamation)

- No salvage as of December 9 but expected to start soon.
- DCC gates are closed unless D1641 criteria warrants opening.

Additional Questions or Comments

- No questions asked.
