

1 **Surface Water Resources and Water**  
2 **Supply Figures**

3 The following figures are included in Chapter 5, Surface Water Resources and  
4 Water Supply.

- 5 • 5.1 California Precipitation Trends
- 6 • 5.2 California Major Water Supply Facilities
- 7 • 5.3 Northern California Major Water Supply Facilities
- 8 • 5.4 San Joaquin Valley and Tulare Lake Major Water Supply Facilities
- 9 • 5.5 San Francisco Bay Area Major Water Supply Facilities
- 10 • 5.6 Central Coast and Southern California Major Water Supply Facilities
- 11 • 5.7 Historical Water Years 2001-2012 Trinity Lake Storage
- 12 • 5.8 Historical Water Year 2001 – 2012 Trinity Lake Elevation
- 13 • 5.9 Historical Water Year 2001 – 2012 Lewiston Reservoir Storage
- 14 • 5.10 Historical Water Year 2001 – 2012 Lewiston Reservoir Elevation
- 15 • 5.11 Historical Water Year 2003 – 2012 Trinity River Mean Daily Flows at  
16 Douglas City
- 17 • 5.12 Historical Water Year 2005 – 2012 Klamath River Mean Daily Flows at  
18 Klamath
- 19 • 5.13 Historical Water Year 2001 – 2012 Whiskeytown Lake Storage
- 20 • 5.14 Historical Water Year 2001 – 2012 Whiskeytown Lake Elevation
- 21 • 5.15 Historical Water Year 2001 – 2012 Clear Creek Mean Daily Flows at Igo
- 22 • 5.16 Historical Water Year 2001 – 2012 Shasta Lake Storage
- 23 • 5.17 Historical Water Year 2001 – 2012 Shasta Lake Elevation
- 24 • 5.18 Historical Water Year 2001 – 2012 Keswick Reservoir Storage
- 25 • 5.19 Historical Water Year 2001 – 2012 Keswick Reservoir Elevation
- 26 • 5.20 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
27 at Bend Bridge
- 28 • 5.21 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
29 at Vina Bridge
- 30 • 5.22 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
31 at Hamilton City

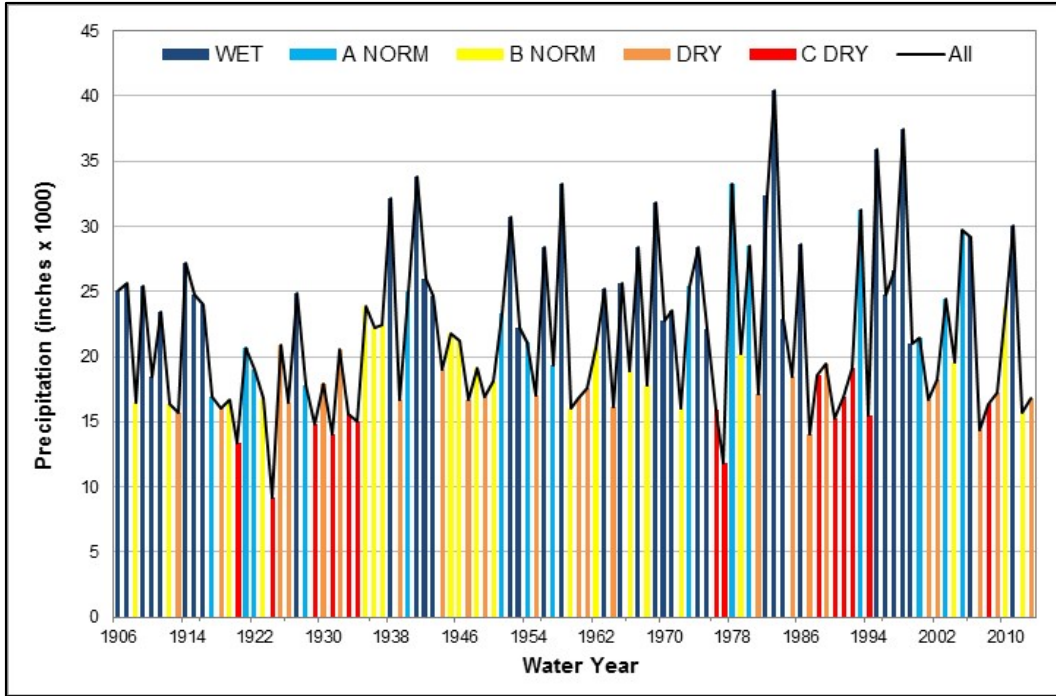

Chapter 5: Surface Water Resources and Water Supply Figures

- 1 • 5.23 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
2 at Wilkins Slough
- 3 • 5.24 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
4 at Verona
- 5 • 5.25 Historical Water Year 2001 – 2012 Sacramento River Mean Daily Flows  
6 at Freeport
- 7 • 5.26 Historical Water Year 2001 – 2012 Flows into Yolo Bypass over  
8 Fremont Weir
- 9 • 5.27 Historical Water Year 2001 – 2012 Lake Oroville Storage
- 10 • 5.28 Historical Water Year 2001 – 2012 Lake Oroville Elevation
- 11 • 5.29 Historical Water Year 2001 – 2012 Thermalito Reservoir Storage
- 12 • 5.30 Historical Water Year 2008 – 2012 Thermalito Reservoir Elevation
- 13 • 5.31 Historical Water Year 2001 – 2012 Feather River Mean Daily Flows near  
14 Gridley
- 15 • 5.32 Historical Water Year 2001 – 2012 Folsom Lake Storage
- 16 • 5.33 Historical Water Year 2001 – 2012 Folsom Lake Elevation
- 17 • 5.34 Historical Water Year 2001 – 2012 Lake Natoma Storage
- 18 • 5.35 Historical Water Year 2001 – 2012 Lake Natoma Elevation
- 19 • 5.36 Historical Water Year 2001 – 2012 American River Mean Daily Flows at  
20 Fair Oaks
- 21 • 5.37 Historical Water Year 2001 – 2012 San Joaquin River Mean Daily Flows  
22 at Mendota
- 23 • 5.38 Historical Water Year 2001 – 2012 San Joaquin River Mean Daily Flows  
24 at Vernalis
- 25 • 5.39 Historical Water Year 2001 – 2012 New Melones Reservoir Storage
- 26 • 5.40 Historical Water Year 2001 – 2012 New Melones Reservoir Elevation
- 27 • 5.41 Historical Water Year 2001 – 2012 Goodwin Reservoir Storage
- 28 • 5.42 Historical Water Year 2001 – 2012 Goodwin Reservoir Elevation
- 29 • 5.43 Historical Water Year 2001 – 2012 Stanislaus River Mean Daily Flows  
30 at Orange Blossom Bridge
- 31 • 5.44 Historical Water Year 2001 – 2012 San Luis Reservoir Storage
- 32 • 5.45 Historical Water Year 2001 – 2012 San Luis Reservoir Elevation
- 33 • 5.46 Historical Water Year 2001 – 2012 Delta Outflow Mean Daily Flows

- 1 • 5.47 Historical Water Year 2001 – 2012 Jones Pumping Plant Mean Daily  
2 Flows
- 3 • 5.48 Historical Water Year 2001 – 2012 Banks Pumping Plant Mean Daily  
4 Flows
- 5 • 5.49 Historical Water Year 2008 – 2012 Barker Slough Pumping Plant Mean  
6 Daily Flows
- 7 • 5.50 Historical Water Year 2008 – 2012 Contra Costa Canal Rock Slough  
8 Intake Mean Daily Flows
- 9 • 5.51 Historical Water Year 2008 – 2012 Contra Costa Water District Old  
10 River Intake Mean Daily Flows
- 11 • 5.52 Historical Water Year 2010 – 2012 Contra Costa Water District Middle  
12 River Intake Mean Daily Flows
- 13 • 5.53 Trinity River below Lewiston Reservoir, Long-Term Average Flow
- 14 • 5.54 Trinity River below Lewiston Reservoir, Wet Year, Long-Term Average  
15 Flow
- 16 • 5.55 Trinity River below Lewiston Reservoir, Dry Year Long-Term Average  
17 Flow
- 18 • 5.56 Sacramento River downstream of Keswick Reservoir, Long-Term  
19 Average Flow
- 20 • 5.57 Sacramento River downstream of Keswick Reservoir, Wet Year Long-  
21 Term Average Flow
- 22 • 5.58 Sacramento River downstream of Keswick Reservoir, Dry Year Long-  
23 Term Average Flow
- 24 • 5.59 Sacramento River at Freeport, Long-Term Average Flow
- 25 • 5.60 Sacramento River at Freeport, Wet Year Long-Term Average Flow
- 26 • 5.61 Sacramento River at Freeport, Dry Year Long-Term Average Flow
- 27 • 5.62 Feather River downstream of Thermalito, Long-Term Average Flow
- 28 • 5.63 Feather River downstream of Thermalito, Wet Year Long-Term Average  
29 Flow
- 30 • 5.64 Feather River downstream of Thermalito, Dry Year Long-Term Average  
31 Flow
- 32 • 5.65 American River downstream of Nimbus Dam, Long-Term Average Flow
- 33 • 5.66 American River downstream of Nimbus Dam, Wet Year Long-Term  
34 Average Flow
- 35 • 5.67 American River downstream of Nimbus Dam, Dry Year Long-Term  
36 Average Flow

Chapter 5: Surface Water Resources and Water Supply Figures

- 1 • 5.68 Stanislaus River below Goodwin, Long-Term Average Flow
- 2 • 5.69 Stanislaus River below Goodwin, Wet Year Long-Term Average Flow
- 3 • 5.70 Stanislaus River below Goodwin, Dry Year Long-Term Average Flow
- 4 • 5.71 San Joaquin River at Vernalis, Long-Term Average Flow
- 5 • 5.72 San Joaquin River at Vernalis, Wet Year Long-Term Average Flow
- 6 • 5.73 San Joaquin River at Vernalis, Dry Year Long-Term Average Flow
- 7 • 5.74 Sacramento/San Joaquin River Delta Outflow, Long-Term Average Flow
- 8 • 5.75 Sacramento/San Joaquin River Delta Outflow, Wet Year Long-Term
- 9 Average Flow
- 10 • 5.76 Sacramento/San Joaquin River Delta Outflow, Dry Year Long-Term
- 11 Average Flow
- 12 • 5.77 Old and Middle River, Long-Term Average Flow
- 13 • 5.78 Old and Middle River, Wet Year Long-Term Average Flow
- 14 • 5.79 Old and Middle River, Dry Year Long-Term Average Flow

2 **Figure 5.7 Historical Water Years 2001-2012 Trinity Lake Storage<sup>1</sup>**

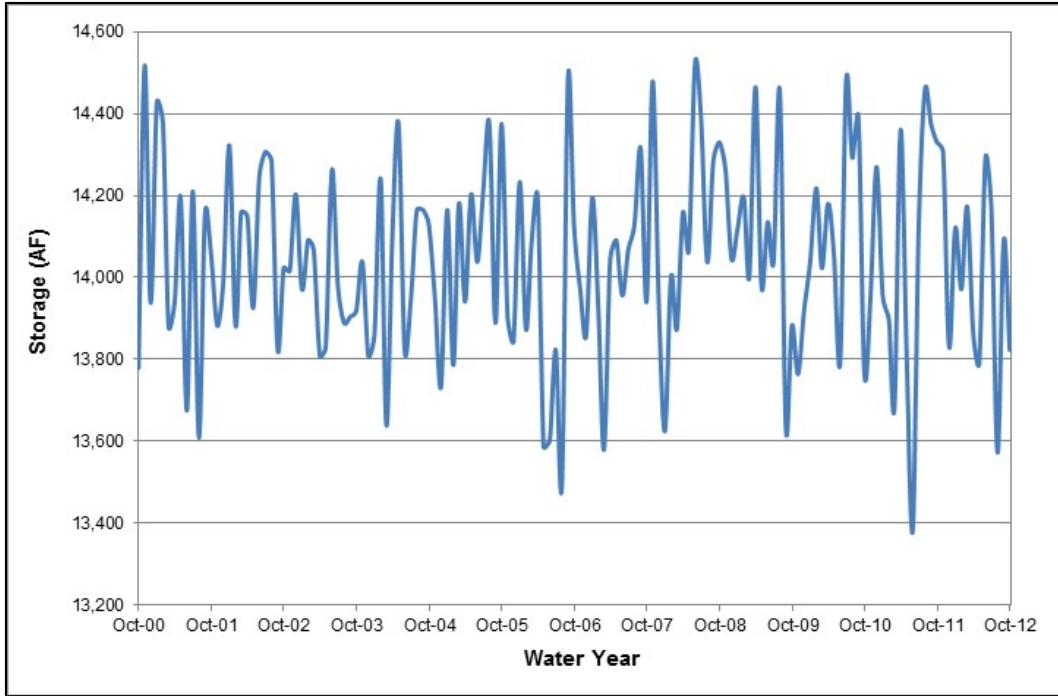

3

4 **Figure 5.8 Historical Water Years 2001-2012 Trinity Lake Elevation<sup>2</sup>**

<sup>1</sup> The minimum storage line of 240,000 AF was taken from CalSim II. The maximum storage line of 2,448,000 AF was taken from the California Data Exchange Center website <http://cdec.water.ca.gov/misc/resinfo.html>.

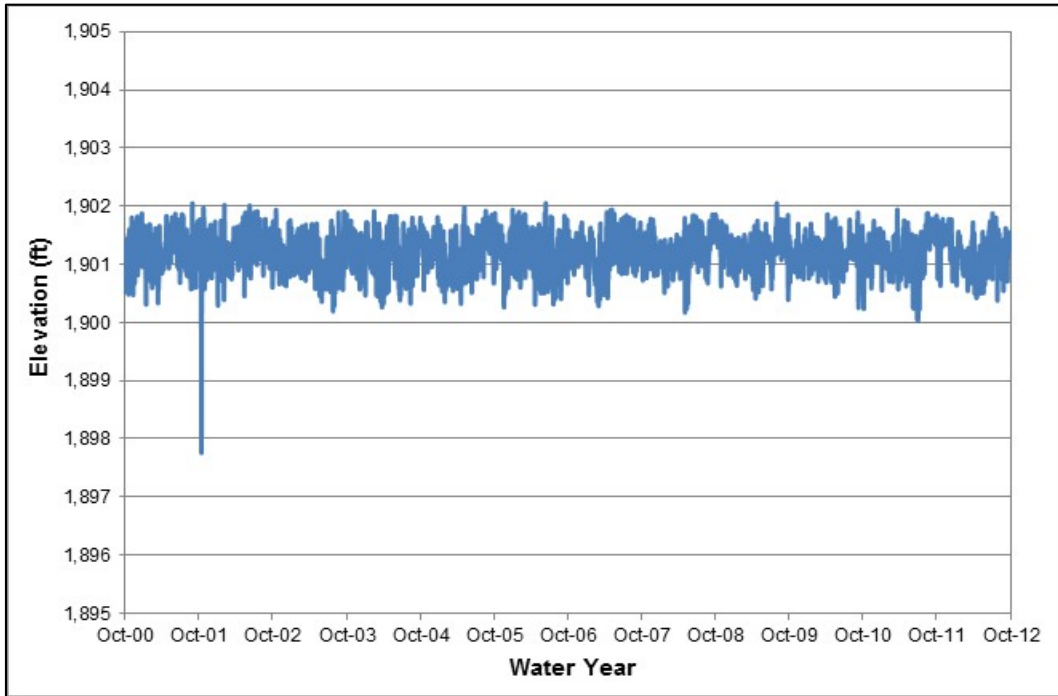

<sup>2</sup> The minimum elevation line of 1995 ft was taken from Reclamation's website [http://www.usbr.gov/projects/Facility.jsp?fac\\_Name=Trinity+Dam&groupName=Dimensions](http://www.usbr.gov/projects/Facility.jsp?fac_Name=Trinity+Dam&groupName=Dimensions). The maximum elevation line of 2,370 ft was provided by Reclamation.

3

4 **Figure 5.14 Historical Water Years 2001-2012 Whiskeytown Lake Elevation<sup>4</sup>**

<sup>3</sup> The minimum storage line of 180,000 AF was taken from CalSim II. The maximum storage line of 241,000 AF was taken from the California Data Exchange Center website <http://cdec.water.ca.gov/misc/resinfo.html>.

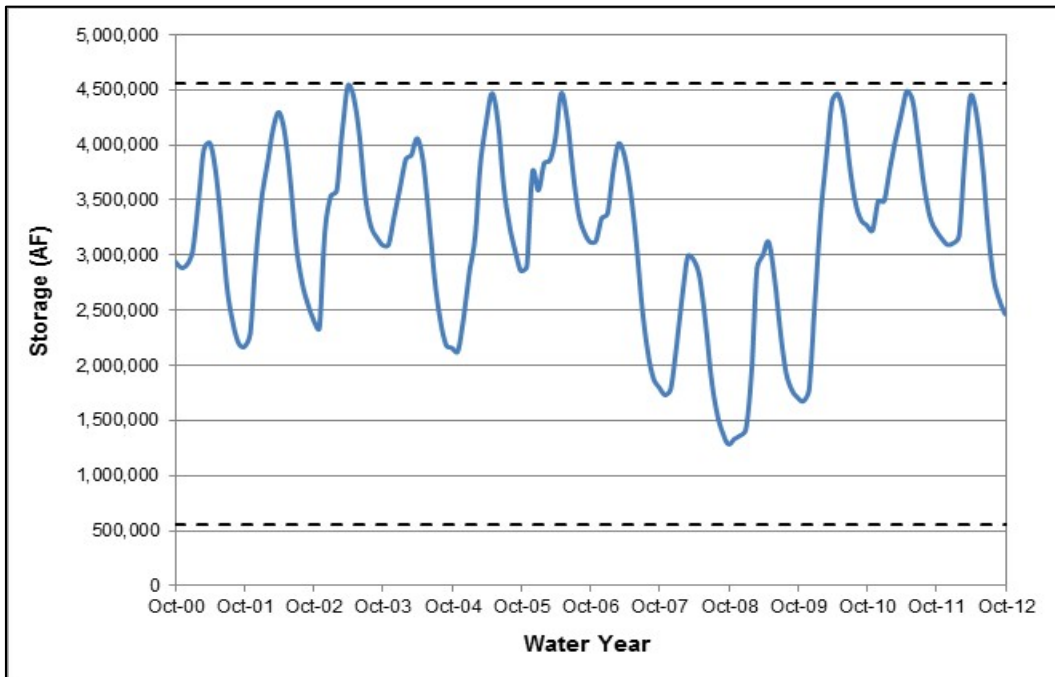

<sup>4</sup> The minimum elevation line of 1190 ft was taken from CalSim II. The maximum elevation line of 1,210 ft was provided by Reclamation.

1

2

**Figure 5.15 Historical Water Years 2001-2012 Clear Creek Mean Daily Flows at Igo**

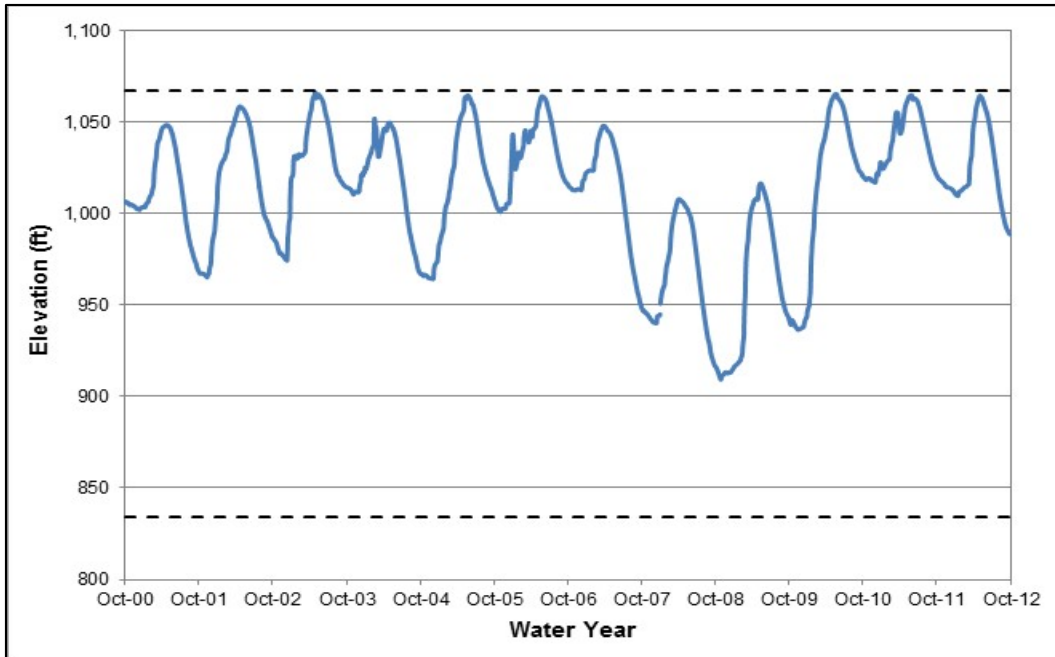

3

4

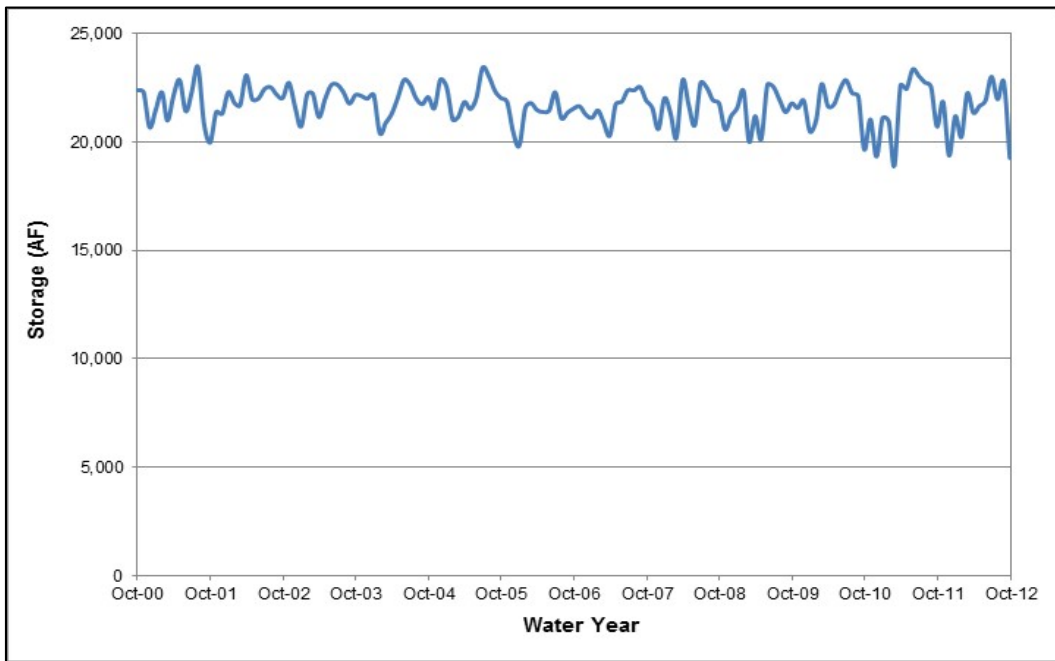

**Figure 5.16 Historical Water Years 2001-2012 Shasta Lake Storage<sup>5</sup>**

<sup>5</sup> The minimum storage line of 550,000 AF was taken from CalSim II. The maximum storage line of 4,552,000 AF was taken from the California Data Exchange Center website <http://cdec.water.ca.gov/misc/resinfo.html>.

1

2 **Figure 5.17 Historical Water Years 2001-2012 Shasta Lake Elevation<sup>6</sup>**

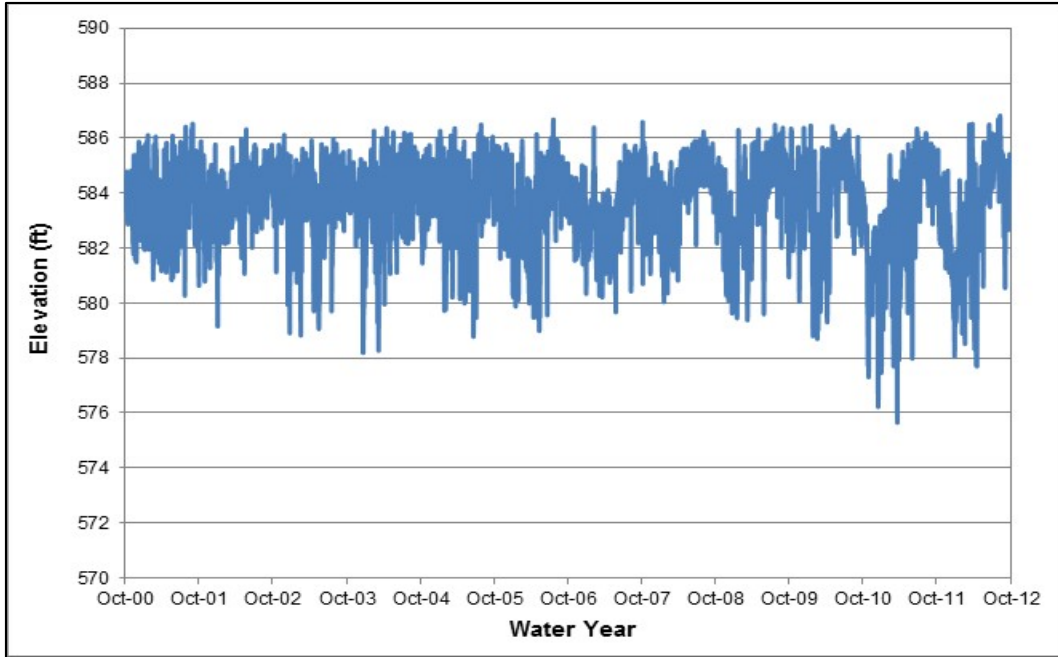

3

4 **Figure 5.18 Historical Water Year 2001 - 2012 Keswick Reservoir Storage**

<sup>6</sup> The minimum elevation line of 834 ft was taken from CalSim II. The maximum elevation line of 1,067 ft was provided by Reclamation.

 5

<sup>15</sup> Based on the 82-year simulation period; Notes: 1) All alternatives are simulated with projected hydrology and sea level at Year 2030 conditions. 2) Model results for Alternatives 1, 4, and Second Basis of Comparison are the same, therefore Alternatives 1 and 4 results are not presented. Qualitative differences, if applicable, are discussed in the text. 3) Model results for Alternative 2 and No Action Alternative are the same, therefore Alternative 2 results are not presented. Qualitative differences, if applicable, are discussed in the text.

<sup>16</sup> Wet-Year and Dry-Year as defined by the Sacramento 40-30-30 Index Water Year Hydrologic Classification (SWRCB D-1641, 1999), projected to year 2030
