COMMENT SHEET

Environmental Impact Statement on the Draft Long-Term Plan for Protecting Late Summer Adult Salmon in the Lower Klamath River

Thank you for your interest in the Long-Term Plan for Protecting Late Summer Adult Salmon in the Lower Klamath River. Please complete the appropriate sections of this form to provide scoping comments. Written comments can be submitted at the Scoping Meeting, faxed to (530) 275-2441, e-mailed to sha-slo-klamath-LTP@usbr.gov, or mailed to:

Paul Zedonis, Bureau of Reclamation, Northern California Area Office,
16349 Shasta Dam Blvd., Shasta Lake, CA 96019

Comments should be received by August 20, 2015, to be considered in defining the scope of the Draft Environmental Impact Statement. For more information about the project, visit http://www.usbr.gov/mp/kbao/docs/long-term_plan_protect_lower_klamath_04-2015.pdf.

I am full-blood Yurok Indian, I am not affiliated with Representing my Tribe but AM proud of ancestry ties. I have been living most of life on Reservation only to attend boarding school in Riverside & Phoenix. I have harvesting salmon, smoking, canning & using in ceremonies. It is part of Inherent Rights to fish the Klamath, RIVER, as well as

All comments become part of the public record.

request for commercial use, for our reservation is
poverty-stricken, I drive 100 miles a day to work
as a nurse, 1

It is sad time because of the drought, no one
has an answer to our ^{water} problem but SPIRIT above. 2
But as individual who has ancestors who relied
on salmon as a way of life. And an avid fisherman.
For natives; this is our way of life, if salmon cannot
run up the River, our way of life is being dissolved.
our children's way of life. Of course, in the 1800's, this
was put on our people to blend into ~~the~~ society of Europeans.
Now, in 2015, I ask you. Release 64,000 acres feet 3
of water, for it will sustain a people of many generations.

Please fold, staple, stamp, and mail.

I believe tribal and local water rights dictate that
the BOR is obligated to release the promised prior water
release to ensure there is not another fish kill as in 2002.
Each year demanding last minute H2O releases is not
sustainable. The releases need to be regular. The great
water demands coming from Southern CA and from

The difference between 2800 cfs & 2500 cfs seems so miniscule; given the cultural / goodwill / indigenous rights / environmental significance, that it should require extraordinary justification & rationale to decide on 2500 cfs rather than 2800 cfs.

Flows should be designed for fish health, not for addressing an emergency. If there is extra water the fish don't need for their health, divert that. I see the plan is to give the minimum ^{augmented} flow needed AFTER fish health is compromised.

All comments become part of the public record.

Once fish are infected with ich, it is too late. It will spread and a fish kill will occur. Flows should be augmented long before infection occurs.

Manage for fish health, not when they are near death. When extinction is near, we must do ALL we can to address it instead of trying to find the minimum effort needed to barely prevent extinction.

The annual emergency must end- support fish health, not minimal efforts.

Please fold, staple, stamp, and mail.

 I prefer electronic communication. I prefer paper mailings.

Please write comments, questions or concerns below. Continue on the back or a separate sheet if necessary.

I grew up in Hoopa and
I want the rivers to be clean,
and cold. I want the river to
be cold for the and Sally
Jewl has been taking most
of our water away from us

All comments become part of the public record.

not just away from
us away from are fish
are fish are dying because
of Sally Jewl. Our river
is warm, and has blue elgye in it.
We're not allowed to swim in the
river or drink the water
from the sinks and they
we can't even breath.
Boys aren't allowed to swim
in the river after stick
games. SO Help Out Salmon

Please fold, staple, stamp, and mail.

My Summers are supposed to be ~~be~~, swim
and no school and one of those things
are out so I watch t.v. all the time and
we can't drink the water ~~we can't~~
we ~~can't~~ can but we have to boil
it.

SHORT TERM:

in the lower Klamath

Min 2800 ~~CFR~~ ^{CFS} be maintained from Aug 10 - Oct 1st, or until the first substantial rain event.

LONG TERM:

priority must be given to salmon ¹

in the Klamath River instead of winter run Chinook in the Sacre. or large scale ag involved in the CVP.

We should not have to ask for it every year. it must be built into law & the long term plan to ensure ecosystem health ~~before~~ above Ag interests

Farms need to be sustainable
