COMMENT SHEET

Draft Environmental Impact Statement/Environmental Impact Report
 Public Hearing
 September 25, 2002

Name Billy and Jill Lyford
 Address 570 Walton Dr
Red Bluff CA

Please add my name to your mailing list. Yes No

My husband's family has lived in Red Bluff for over 50 years. One of the aspects of this area that has appealed to them is the river, both for recreation as well as fishing. There has always been a balance. Why can't we keep the balance? I have only lived in Red Bluff for 7 years. Even though I am relatively new here, I still have a sense of pride for my town as I drive over the Sac. River when it is full and beautiful. One sorely point for me and my move here from Chico was and is the river. Our family has grown up on the water. Our hobbies, passions and sanity are tightly woven into the river and all it produces for us. We also have a concern for those with beautiful riverfront properties. What happens to the property value of their homes if the river is no longer filled to its capacity? There has to be a happy medium.

COMMENT SHEET

Draft Environmental Impact Statement/Environmental Impact Report
 Public Hearing
 September 25, 2002

Name BRIAN HUMPHREY
 Address 2495 CIMARRON DR.
RED BLUFF, CA 96080

Please add my name to your mailing list. Yes No

*PLEASE EXPLAIN TO ME WHY IT IS ALRIGHT TO
 HARVEST A LISTED SPECIES, VIA RECREATIONAL & COMMERCIAL
 FISHING, BUT IT IS NOT ACCEPTABLE TO LIMIT THE NUMBER
 NUMBERED FISH PASSAGE. I BELIEVE WE SHOULD IMPROVE
 FISH PASSAGE WHENEVER POSSIBLE, BUT NOT AT THE
 EXPENSE OF A COMMUNITY. I BELIEVE ALTERNATIVE
 1A WOULD ACCOMPLISH BOTH NEEDS, THE NEED FOR
 FISH PASSAGE IMPROVEMENT & KEEPING LAKE RED BLUFF*

48-1

48-2

48-1

The statement that it is all right to harvest a listed species is incorrect. The CDFG regulations provide angling restrictions that prohibit angling for listed species (e.g., winter- and spring-run Chinook salmon, and steelhead) within inland waters where those species occur. In addition, ocean recreational angling and commercial harvest are regulated by PFMC in cooperation with the FGC. Amendment 12, dated July 31, 1997, of PFMC's Pacific Coast Salmon Plan (PFMC, 1997) provides the following management objectives that specifically address harvest of listed salmon species:

- Escapements of salmon stocks listed under ESA will meet or exceed NMFS's jeopardy standards of objectives of NMFS's recovery plans
- In managing mixed-stock salmon fishing, PFMC will establish maximum exploitation rates according to the level that can be sustained by the weakest natural spawning stocks for which specific management objectives have been defined in the Plan and that are consistent with NMFS's jeopardy standards or recovery plans for stocks listed under ESA

The PFMC annually proposes, prepares, and implements salmon harvest management measures to ensure the fishery management objectives protective of listed species are met.

Thank you for taking time to read this.
 My children (8+6) learned to ski in Lake
 Red Bluff. We are busy people. The opportunity
 to put our boat in the water on dry gived
 day with little prep time is immeasurable.
 Without LRB, we would go boating far less
 often. We would ~~by~~ buy gas, food, soda, ice,
 etc, far less often. Not only out of towners, but
 our own Red Bluff citizens would be forced to
 spend their money elsewhere. I know I'm rambling.

Personally, Lake Red Bluff is probably the
 most important reason that we continue to live here.
 Without Lake Red Bluff we have little reason not
 to move closer to Redding.

COMMENT SHEET
 Draft Environmental Impact Statement/Environmental Impact Report
 Public Hearing
 September 25, 2002

Name William W. Jones & Mary L. Jones
 Address 21615 Mayhew Dr
Red Bluff, Ca 96080

Please add my name to your mailing list. Yes No

We feel that Red Bluff Lake should be kept as long as possible. Sending water south west of the Sacramento river for the farmers below is much cheaper than having to pump it. If the lake wasn't there boating would become almost zero and it would hurt the entire town of Red Bluff and all the people that have homes on the river just because of the lake. We are definitely against any change in lowering the lake.

We need another 8-10 years of experience with the 4 months gates in made to better evaluate what occurs during the eight months gates out ~~experience~~ the gates are out. Have the flood years 1955, 1964, 1973, 1983, 1986 etc been factored in as well as the drought years, 1976 etc.

56-1

The 4-month gates-in operation of RBDD has been mandated since 1993. Since that time, numerous Chinook salmon cohorts (year-classes) have been affected by these gate operations. Information obtained prior to and since 1993 indicate that a very large number of some runs of Chinook salmon, steelhead, and green sturgeon are delayed and/or blocked during their attempt to migrate past RBDD. "Studying" the effects of the 8-month gates-out operation will not change the inherent life history timing characteristics of the species that are affected. In addition, continued inaction will not assist in their recovery as required by ESA.

56-2

Thank you for your comment. Responses are only given for comments that directly relate to content in the DEIS/EIR. See DEIS/EIR Section 3.3, Water Resources, for further information pertaining to this comment.

I AM IN FAVOR OF GATES IN 4 MONTHS FOR THE FOLLOWING REASONS:

ARBUCKLE

1. I AM NOT IN FAVOR OF Bigger Pumps, WE SPENT APPROX 20 MILLION ON THE PUMPS THAT IN NOW THAT DO NOT WORK NOW. WHY SPEND MILLIONS MORE FOR UNPROVEN PUMPS THAT MAY NOT WORK!

58-1

2. WHY GIVE MORE ^{WATER} TO AGRICULTURE WE JUST PAID TO HAVE THOUSANDS OF PRUNE TREES DESTROYED BECAUSE WE PRODUCE TOO MUCH AGRICULTURE.

58-2

3. I BELIEVE THE GATES IN 4 MONTHS ADEQUATELY SERVES MOST NEEDS OF SPORTSMEN, FARMERS AND RECREATION BOATERS.

58-3

- 58-1 Thank you for your comment. Your comment has been noted. No response is required.
- 58-2 DEIS/EIR Section 3.3, Water Resources, page 3-68, indicates that the present diversion capacity at RBDD is 2,530 cfs. The capacity of the current pump (assuming RPP) is less than 10 percent of the required pumping capacity needed to meet the present water needs for TCCA. Additional pumps would need to be installed to maintain present level of delivery if the gates were not lowered to allow for gravity diversion.

We moved to Red Bluff 50 yrs ago - We started developing property - motels - restaurants - mobile home parks - etc etc - The river flow was doing beautifully for everyone involved in this "Village" - Then the dam had to be built to send water to Southern Calif - Ruined - Fishing - Hunting - Tourism - this Village has been trying to survive for 50 years. We finally got a flow of business - reding has been progressing - because your Politicians are thick up their end has a lot of Pull from Sacramento - So - Red Bluff loses again - but this seemed not of no value - because you have decided already what you are going to do - Give Southern Calif all of our natural resources -

We need to keep Lake Red Bluff because it provides recreation for all ages; it provides a wonderful, peaceful scene for the entire community as well as anyone passing through. Surely the short time it takes to fill the lake cannot starve areas down stream. There are many solutions to the fish problems, I hope we will not ignore them!
Save Lake Red Bluff!
