RE: Wyoming -- Palisades Contract

Dear Rich:

Thank you for including me on your mailing list concerning the proposed Bureau of Reclamation contract with Wyoming as to the 33,000 A/F of Palisades Reservoir storage.

Before I comment on the proposed Agreement, I need some more information:

1. Is it contemplated that Wyoming can control the water through Palisades after the water would be released from Jackson Reservoir?
2. What happens if the Jackson space does not refill? Is the water then physically in Palisades stored to the credit of the space from which it physically came?
3. Will Wyoming pay O & M on the Palisades space? *yes*
4. In the event that Wyoming releases 33,000 A/F from Jackson, but both reservoirs thereafter refill, does Wyoming have anything? . . . Or is the water available to other uses until the refill season would start on the following October 15?

I'll reserve my other comments until I can analyze your answers to the above questions.

Respectfully submitted,

JOHN A. ROSHOLT
