Theodore Roosevelt Lake

Area and Capacity Tables

**U.S. Department of the Interior
Bureau of Reclamation
Technical Service Center
Denver, Colorado**

May 2013

The tables for Theodore Roosevelt Lake were generated by means of the area-capacity program ACAP using the least squares method of curve fitting developed by the Bureau of Reclamation Technical Service Center. This program computes area at 1.0-, 0.1-, and 0.01-foot increments by linear interpolation between basic data contours. Area equations are, $AREA = A2 + (X)(A3+A3)$. The respective capacities and capacity equations are then obtained by integration of the area equations. The initial capacity equation is tested over successive intervals to check whether it fits within an allowable error term. At the next interval beyond, a new capacity equation (integrated from the basic area equation over that interval) begins testing the fit until it too exceeds the error term. The capacity curve thus becomes a series of curves, each fitting a certain region of data. The final area equations are obtained by differentiation of the capacity equations. Capacity equations are of the form $CAPACITY = A1 + A2(X) + A3X^2$ where X is the elevation above an elevation base. The capacity equation coefficients for the reservoir are shown below ($\epsilon = 0.000001$).

The Theodore Roosevelt Lake survey in May 2013 used the contour method to obtain the basic data for these tables. Close interval profiles of the underwater portion of the reservoir were collected by standard surveying techniques using a global positioning system and a multibeam echo sounder. The above-water portion was determined from 2012 LiDAR and 5-foot 1995 contours. The ACAP program interpolated the presented results from elevation 1,965.0 through 2,225.0. The 2013 survey and the reduction of the data were completed by personnel from Reclamation's Sedimentation and River Hydraulics Group of the Technical Service Center in Denver, Colorado. All data for these tables are tied to the National Geodetic Vertical Datum of 1929 (NGVD29) that is 2.0 feet lower than the North American Vertical Datum of 1988 (NAVD88).
